# WhitePaper<sup>v1.0</sup>

Published on Sep, 2021

Bitroyce is the first leading Exchange  
and Networking Platform

# ABSTRACT

Bitroyce is a decentralized platform that supports social interaction, organic growth, financial freedom, and community development with BYC Token. It is an innovative approach towards a transparent and independent means of financial freedom, user data ownership, reward on contribution, and free of speech.

Some main factors which increase user's involvement in any ecosystem or cryptocurrency include low fees, discounts, and a fair economic system reflecting reward and appreciation on each user participation.

After considering these points, Bitroyce is offering rewards based on activity to unlimited users along with advanced features i.e. Exchange, wallet, messenger, application, reward, gifts, groups, etc.

This whitepaper will provide a detailed description of our target market, current development, associated products in the line, solution for the existing problems and fundraising process. This document will also inform our supporters and readers about how Bitroyce is going to use the connection and expertise of its team members to revolutionize the social networking market by using advanced features and technology with optimized speed, security, and efficient services.

## Bitroyce is transparent platform on Binance Smart Chain integrating crypto wallet and decentralized exchange to simplify the decentralized finance

Bitroyce has developed its business idea on the latest trend using BYC token and blockchain to facilitate exchange users and social media networking. In the last few years, some talented teams have already worked on this concept but our several advance features make Bitroyce unique and successful among all.

1. We have a diverse team having market connections with the blockchain, exchange and social media industry.
2. Our technological aspect is quite strong with 3 unique products in line i.e. Bitroyce Messenger, Bitroyce Wallet and Bitroyce Exchange.
3. We are working to create an ecosystem with trending features i.e. Android & iOS mobile wallet with escrow system in messenger; and local currency buying option with multilingual support in Exchange, decentralized social networking platform.
4. We are offering low transaction and trading fees with easy-to-understand use cases.
5. We are giving 24/7 customer support, special premium packages, high security, rewarding features.
6. The VC vesting lockup period indicates high trust level of the team in Bitroyce

## What Is Bitroyce Target Market?

The primary target market for Bitroyce is active traders, beginners, merchants, expert marketers, advertisers, and creative content makers. These people always search for advanced features with low fees and additional rewards. Therefore, the Bitroyce team wants to use their activity as an opportunity for the adoption of its platform.

# What Is Bitroyce Platform?

Bitroyce is an ecosystem on BSC, offering real-life crypto use along with efficient and fast solutions to a decentralized world. Bitroyce wallet will be a secure and easy-to-use wallet supporting funds transfer for better adoption of crypto among regular users. While Bitroyce Exchange along with other products will be a game-changer.

Bitroyce Application will be a decentralized social networking platform that puts user's privacy and satisfaction as its first priority. It is an advanced approach towards transparent means of rewards based on activity, user data ownership, and free of speech. Being the first get paid to content creation and sharing ecosystem, Bitroyce aims to leverage BYC token payments for its reward system.

It offers a simple model to allow the users to monetize contributions of other contributors which will help to grow the platform gradually. Furthermore, there are no geographical barriers, so users from any side of the world can use Bitroyce network to share or search their favorite content.

## Our Vision

Our vision is to become the leading Exchange and networking platform for active users, content makers, influencers, advertisers, marketers. Through tokenized economy and blockchain technology, we want to eliminate the interference of third parties and centralized authorities leading to low transaction and service fees.

# Benefits

## Low fees

When users will send and receive the digital asset through their Bitroyce messenger or App, it will cost them low transaction fees. Also, Bitroyce is charging a tiny amount as withdrawal and trading fee on Bitroyce exchange.

## Multiple digital asset support

Bitroyce is supporting an infinite number of digital assets but initially most demanded cryptocurrencies will be available in messenger wallet.

## 24/7 customer support

Bitroyce is offering efficient customer support service through live chat, support group, and email. Once the user's request will be received, the team will instantly solve their issue ensuring both safety and convenience.

## Invitation and user activity reward

Users can earn rewards after the complete registration of new members through their invitation link. Furthermore, Bitroyce is offering activity rewards to increase user involvement which is an indirect and direct way of promotion.

## Easy to use platform

Bitroyce is providing optimize exchange services with easy to understand user interface.

## Global community

Bitroyce is offering the multilingual feature to cover millions of users from different countries

# Products Description

## Bitroyce Exchange

Users can buy, sell and exchange BYC token along with other assets on Bitroyce exchange. Exchange connection with the Bitroyce app and messenger will make trading more secure. Trading fees and withdrawal fees which contribute mainly to exchange income are very low. Also, Bitroyce is going to offer invitation bonuses, incentive bonuses,es and trading fee discounts to BYC holders.

Incentive bonus simply means 40% of total trading fees collected by Bitroyce exchange will be recycled back in the form of bonus to BYC holders. Furthermore, 30% of the income will be used for advanced technology, security, customer support, and promotion.

Bitroyce aims to offer decentralization in a true sense through its platform with financial safety, efficient services, digital bonus, and Multilingual support. More detail about features will be shared in the next announcement. BYC holding will give a chance to users to increase their wealth and get discounts which will become a source of their passive income.

Furthermore, data security and safe trading is the first priority of Bitroyce team. That's why for the protection of user assets and privacy, Bitroyce security team has included periodic reviews and system updating in the development goals. After conducting a deep research of blockchain market, the Bitroyce team has made this technical architecture of Bitroyce exchange to deliver efficient and seamless services to community members.

**Bitroyce Will Be A Game Changer**

## Bitroyce Messenger

Bitroyce messenger is a unique approach towards a transparent, light and free peer to peer network with a crypto wallet that supports digital assets. Furthermore, the Escrow feature is available for transparent dealing with low fees of the total trade. The messenger wallet is capable to perform fast peer to peer transactions between Bitroyce users.

### Transparent Escrow system

On Bitroyce Messenger, each escrow transaction is the transparent revealing date of the agreement, amount of funds transfers, and status of funds. To safe Bitroyce messenger, users safe from fraud escrow fee will be shared 50-50 percent between both sender and receiver. Once the order is completed and both parties get satisfied, the selected amount will be released and added to the seller or content creator account in the form of BYC tokens. The ranking or trust status will help the users to finalize a deal. In case of a conflict, any party involved in the agreement can request for dispute resolution. Bitroyce platform will select a jury from trusted users and Bitroyce administration to make a decision according to terms and conditions of the agreement.

### Integrated Wallet

Bitroyce messenger has its own encrypted wallet which will support funds transfer and crypto adoption among regular users. Bitroyce messenger will become the future of sending funds and messaging. Initially the wallet will support the BYC token and top cryptocurrencies but with the passage of time we will keep adding other digital assets.

## Bitroyce Application

The Bitroyce application is based on decentralized social media network that will bridge the gap among influencers, artists, content creators film makers, advertisers and users for the promotion of creative work. It has a decentralized framework that utilize blockchain technology for marketing, rewarding, engagement, contribution, clearing payments and tipping. That simply means Bitroyce members will be directly rewarded and paid in BYC for their contribution. Bitroyce Application also have advance features of chatting, voting, status and picture posting along with search tool. Through regular notifications users will keep updated about each new move of the content makers which can be customized from setting. Bitroyce team aims to treat each member as an Ambassador of Bitroyce platform so the new members joining Bitroyce community with their referral will become a way to earn BYC tokens for them. User will also earn BYC by following other contributors, watching videos and high user activity. Status and Bitroyce live feature will provide a platform to members for broadcasting live videos from smartphones.

Content creator will get a share in reward by creating and posting high quality content to engage more followers. Donation on content, paid subscription to exclusive content and rewards from users will allow content creators to get direct support from Bitroyce community. It will also provide autonomous peer to peer monetization to reduce the risk of demonetization, fake likes and censorship. Bitroyce team has a mission to provide high reliability, security and user data ownership to increase user activity that will maximize their reward. The reward pool is based on a point system which will be discussed in detail under Bitroyce reward system.

Bitroyce application will become a way to connect the content makers to famous brands and advertisers who can pay directly in BYC for their promotion. With few BYC in wallet publishers can boost their posts, pages or websites locally or globally. They can get access to special effects, background music and Bitroyce gifts through content creator premium package.

# Economic Structure

---

## Messenger & Application Earning

- **Escrow fee:** Bitroyce is charging a low escrow fee of the total traded amount.
- **Transaction fee:** Transaction fees are kept very low which will be split 50-50 percent between both sender and receiver.
- **Premium packages:** Both content makers and advertisers can take advantage of premium content packages and premium marketing packages after paying in BYC tokens.
- **Boosting feature:** Depending on the time period and budget, both advertisers and content makers can use boosting features to increase their brand credibility.

## Expenditures

- **User Activity bonus:** Bitroyce platform will distribute bonus among community members based on their activity.
- **Content Creation reward:** Publishers and content makers will get BYC tokens reward for their engaging content.

## Exchange Earning

- **Listing fee:** On the demand of the community, news assets and digital currencies will be added in the Bitroyce Exchange. New emerging crypto teams can also submit their coin/token after clearing the listing fee on exchange.
- **Withdraw fee:** Very low withdrawal fee will be charged to withdraw funds from Bitroyce exchange.

- **Incentive bonus:** Percentage of exchange earning will be distributed among BYC holders.
- **Discounts:** BYC holders will get 1% discount on services for holding BYC in accounts

# BYC Token

---

Bitroyce platform is utilizing Binance Smart Chain to tokenize its business framework and offer services to content makers, users and advertisers. The decentralized payment method will ensure transparency and security which was missing in centralized social media networking models.

## Token Detail

BYC is a BEP-20 compatible token with following token utility

- BYC will be used to pay transaction fee, listing fee and withdraw fee along with rewarding users on the basis of their activity and engagement.
- BYC tokens will give access to community members to features and tools available within Bitroyce ecosystem i.e. users can buy gifts, analytical tools etc.
- BYC tokens will serve as a payment mode within the Bitroyce platform
- After getting discounts and rewards, BYC token holders can buy premium packages for marketing or group memberships with the collected funds.

All transactions on Bitroyce platform will be saved on Blockchain, containing anonymized data of the two parties involved in dealing. Also, The fee and premium packages payment collected from the Bitroyce ecosystem will be used for platform development and upgrading or it will be recycled back to reward pool.

## Token Allocation

The detail of token allocation is

50% Public Sale

10% Team & Founders

10% Marketing

2% Private Sale

10% Burning

3% Reserve

15% Platform development
